Power skating was designed to improve and master skating techniques for both hockey and ringette players. It is not a miracle program, like they say what you put in, is what you get out, we cannot expect to take one power skating lesson and then become a superstar, it takes time, practice and dedication to become an excellent skater. Power skating is not only for straight line acceleration, but for all skating skill areas, backward skating, tight glide turns, forward and backward crossovers, are just a few areas we focus on. So the end result of power skating lessons with us means a complete skater in ALL areas.
